

ATTESTATION

Nov. 28, 2011

To whom it may concern,

BV LCIE China has completed the Salt Mist and Ammonia tests for UP-Solar PV panels, including the samples with *standard-type* frame and *ZEP-type* frame, each of which has both black and white colors.

Samples are performed Salt Mist test according to the requirements from IEC61701 and IEC60068-2-11 (Test Ka), and Ammonia test according to the requirements from IEC62716. After the Salt Mist and Ammonia tests, the samples of both frame types have no corrosion on the appearance, and the function of the modules remains good. Therefore, both types pass the tests.

Detailed testing results and pictures of the samples' appearance can be referred to the report.

Should you have any question, please feel free to contact me.

Thank you!
